## SUMMARY

Aspiring Software Developer with a solid foundation in Java, MySQL, HTML, CSS, JavaScript, Hibernate, Spring and Spring boot. Experienced in building full-stack web applications through real-world projects, demonstrating a strong ability to deliver innovative solutions. Eager to leverage my skills and further develop in a software development role.

## EDUCATION

<b>Bachelor of Technology in Computer Science and Engineering (Data Science)</b> <i>Sri Venkateswara College of Engineering, Tirupati, 8.91 / 10 CGPA</i>	<i>Dec 2021 - May 2025</i>
<b>12th (Board of Intermediate Education Andhra Pradesh)</b> <i>Sri Chaitanya Junior College, 96%</i>	<i>March 2021</i>
<b>10th (Board of Secondary Education Andhra Pradesh)</b> <i>Narayana EM High School, 10/10 CGPA</i>	<i>March 2019</i>

## SKILLS

**Programming Languages:** Java, JavaScript  
**Frontend Technologies:** React.js, HTML5, CSS3  
**Backend Technologies:** JDBC, JEE, JSP  
**Database Management:** MySQL  
**Frameworks:** Spring boot, Hibernate

## WORK EXPERIENCE

<b>Tap Academy</b> <i>Java Full Stack Development Intern</i> Mastered Core Java, Advanced Java (JDBC, J2EE, Servlets), Spring, Hibernate, MySQL, React, and Frontend Development. Gained hands-on experience in OOP, Collections, Multithreading, Exception Handling, and Java 8 features (Lambda Expressions, Stream API). Applied skills in multiple projects, including a capstone Smart Attendance System, showcasing full-stack development from database integration to responsive UI design.	<i>Jan 2025 - June 2025</i>
---	-----------------------------

## PROJECTS

<b>Smart Attendance System</b> • Developed a web-based application that enabled faculty to generate dynamic QR codes for secure and real-time student attendance tracking. • Implemented role-based access with separate portals for faculty and students, streamlining the attendance process and reducing manual errors.	<a href="https://smart-attendance-systems-1.onrender.com/">https://smart-attendance-systems-1.onrender.com/</a>
<b>Movie Explorer (A Full-Stack Movie Discovery Web Application)</b> • Engineered a service-oriented backend using Spring Boot to build a robust RESTful API, serving as the central point for all data operations. • Integrated the third-party TMDb API to fetch and manage real-time movie data, creating endpoints for popular movies, detailed searches, genre filtering, and streaming provider information. • Developed a dynamic frontend with vanilla JavaScript that communicates with the REST API, handling asynchronous JSON data to create a feature-rich, multi-page user interface.	<a href="https://the-movie-explorer.netlify.app/">https://the-movie-explorer.netlify.app/</a>

## CERTIFICATIONS

**Programming Using Java** (Infosys)  
**Introduction to SQL** (Davidson College)  
**Python** (IBM)

## HOBBIES

Interests include watching movies, exploring internet
